

## Tree Maintenance Snap-on

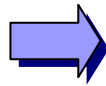

**Streamlined  
Tree  
Maintenance**

**Improved  
Controls**

**Immediate  
ROI**

Trees are a very important part of your PeopleSoft system. They control many aspects of how your application works including:

- How numbers are reported against
- How security is applied
- How application controls are enforced

The Grey Sparling Tree Maintenance snap-on is a must-have for organizations using trees to in their business rules to ensure that all their trees are accurate, and to minimize the ongoing cost of maintaining and administering their trees.

This product addresses the most significant issues surrounding the maintenance of trees.

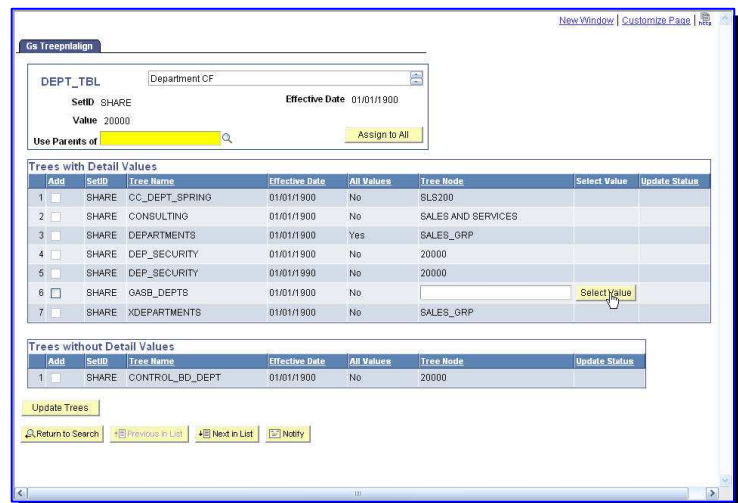

- It tracks which trees need to be updated based on your business activity.
- It facilitates the updates across all the trees by finding and leveraging commonalities in the trees.
- It ties tree updates to your processing and reporting results.

In less than 1 hour, you can improve the controls over one of the most important set of business rules in your application while reducing your maintenance, support, and reporting costs.

## Features

This product accomplishes this with the following features:

1. **IN-LINE UPDATES TO YOUR TREES**, capturing updates at the point in which they are entered and facilitating updates to your trees. This includes identifying the updates that require your trees to be updated and automating those updates.
2. **INTUITIVE TREE UPDATE USER INTERFACE** that looks for rules that span your different trees to facilitate the assignment and update of those trees.
3. **AUTOMATIC ASSIGNMENT OF NODES** which allows you to include new values in your trees without requiring any user intervention.

- BATCH UPDATING OF TREES**, facilitating the maintenance of all affected trees in groups as needed.
- SIMPLE AND EASY DEPLOYMENT**. You can install and begin using this product within ½ hour.

## Benefits

With these features, you can leverage the following benefits:

- TIGHTER CONTROLS** over the business rules that drive processing in your PeopleSoft Application.
- IMPROVED PRODUCTIVITY** over your ongoing maintenance activities. Because this product identifies updates that need to be made and facilitates the updates across multiple trees, your employees can spend less time making updates and more time doing other things.
