

## Report Explorer PeopleSoft Solutions Extender

Your organization has invested a lot in building reports to meet the diverse needs of your employees. Yet, with all this investment, employees are having a hard time finding the information they need or simply aren't utilizing the reports and tools available to them.

Like most organizations, you use a variety of reporting tools, and generate a lot of reports. Your users want a single place where they can find their reports in a manner that is simple and easy for them to use. Unfortunately, the tools available to most organizations cannot share content across different reporting tools. Even within a reporting tool, users have to find reports based on the report name, or a static structure that an IT person has mapped the report to.

Grey Sparling Solutions, Inc. allows your reporting users the ability to organize, find, and list reports based on the content of those reports while using the rich information in your business applications to categorize and navigate to those reports. This allows your users to find reports based on the way they use reports:

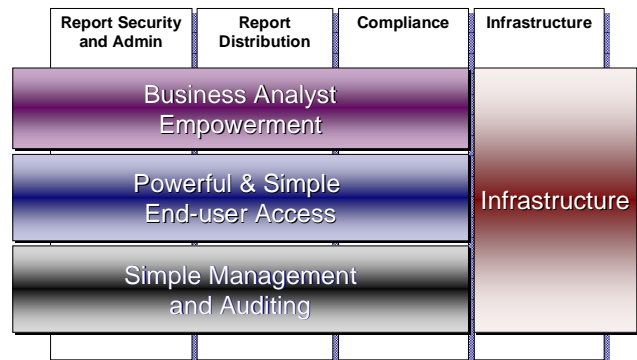

- All reports that show information for a given customer.
- All reports needed to support my documented financial controls.
- Reports related to different parts of my organizational hierarchy.

## Powerful Features for your PeopleSoft system

This product provides features for you in 4 major areas. Within each area, we've provided features to reduce costs, reduce risk, and improve access to information.

### Business Analyst Empowerment

We provide a safe and flexible way for business analysts to control the behavior of the system without requiring IT to modify delivered code.

### Business User Empowerment

- Simple / Powerful configuration, leveraging your PeopleSoft application
  - Report Category / Organization configuration
  - Search / Navigation configuration
  - Display / Results configuration
- Immediate feedback for configuration changes in report explorer.

### Powerful and Simple End-user access

Using powerful navigation techniques, compelling formatting, and intelligent knowledge of your PeopleSoft application, we make it easy for end-users to find and use their reports.

### Powerful & Simple End-user access

- Rich navigation using business terms in application
  - Trees
  - Meaningful business entities (i.e. vendors, customers, products)
- Report Content-based searching
- Rich search results
- Favorites

## Simple Management and Auditing

We provide a single place where your users can access reports across different systems and reporting tools. This allows your administrators to go to one place to set up and administer the user experience in addition to providing a single place where your business users can access all their reports.

In addition, you can make changes to the structure and organization of your historical reports without needing to re-run them. Because the Report Explorer user interface uses the contents of the report as the source for defining navigation rules, your administrators can tweak the user experience quickly and easily.

### Simple Management and Auditing

- Single place for accessing all reports
- Allows you to use your existing reports better across multiple reporting technologies
- Allows configuration changes to be made without requiring re-indexing or re-running of existing reports.

## Real benefits you can leverage today

Report Explorer is a product that allows you to realize significant benefits quickly and easily. By improving the use of your existing investment in your ERP application and reporting technologies and empowering your business users to control system behavior, we allow you to:

- Dramatically reduce your costs
- Dramatically reduce operational risks
- Support better decision making

Because you can deploy this product on using your existing PeopleSoft application, you can realize these benefits more quickly and with less risk than with any alternative.

### Supports Better Decision Making

- Improved adoption of reports and business intelligence
- Reduced time to find and use reports.
- Comprehension of report content

### Dramatically Reduces Costs

- Report administrative costs
- Information distribution costs
- Support costs
- Deployment costs
- Upgrade costs

### Dramatically Lowers Risks

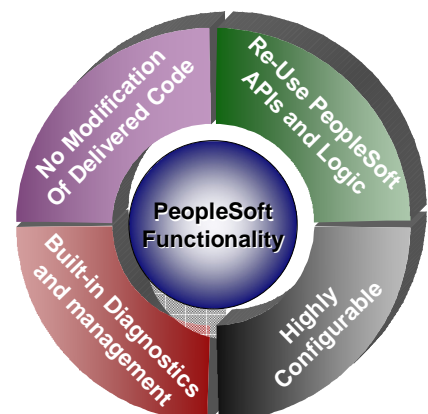

- Implementation risks
- Business Process Control risks
- Audit results

## Built for your success

We deliver our products as extensions of your PeopleSoft application. Because your application already contains a robust infrastructure for managing processing, handling business logic, and providing access to content, our strategy is to make the most of this infrastructure. This means fewer moving parts and less risk for you.

We also provide powerful support and diagnostic tools to reduce deployment and support costs. Finally, all of our solutions are highly configurable to allow you to set desired behavior without having to touch our code.

Learn today why leading financial services institutions are using this solution to manage and distribute thousands of financial reports throughout their organizations.

## Who is Grey Sparling Solutions, Inc?

Grey Sparling Solutions, Inc. was founded to provide PeopleSoft customers enhanced functionality to meet their business needs using their existing PeopleSoft systems. Our products are built and deployed in a manner that eliminates implementation, upgrade, and integration risks.

Because we are the people who built PeopleTools, we are able to use our expertise to create products that are easy to deploy and use, while meeting the needs of the PeopleSoft customer.
